

ANNE LEINA LENKU

IT Professional | Full-Stack Developer | Healthcare IT Specialist
+254 711 410 982 • annelenku@gmail.com • Nairobi, Kenya

PROFESSIONAL SUMMARY

Versatile IT professional with a Diploma in Information Technology and a Certification in Generative AI, combining full-stack web development skills with deep healthcare IT experience. Proven ability to design and deploy software solutions, administer enterprise systems (EHR/EMR, billing platforms), manage network infrastructure, and leverage AI tools to accelerate delivery. Equally comfortable writing production code, troubleshooting complex environments, and translating technical solutions for non-technical stakeholders. Passionate about applying modern software and data practices to real-world problems in both the tech and health sectors.

CORE COMPETENCIES

Software Development

- › Full-Stack Web Development (React, Node.js, Express)
- › Python (scripting, automation, data)
- › Java & HTML/CSS/JavaScript
- › REST API Design & Integration
- › Database Design – MySQL, SQL Server

AI & Data

- › Generative AI & Prompt Engineering
- › AI-assisted development workflows
- › Data analysis & reporting
- › Process automation
- › Emerging technology evaluation

Cloud & DevOps

- › Git & GitHub version control
- › Linux administration (CLI, bash scripting)
- › Network Admin – TCP/IP, DNS, Firewalls
- › Cybersecurity & Hack the Box challenges
- › IT Asset & Helpdesk Management

Healthcare IT

- › EHR/EMR platforms (KenyaEMR, DHIS2)
- › Smart Health & Smart Link billing systems
- › ICD-10 / HCPCS coding support
- › Health data governance & PHI compliance
- › Insurance verification & revenue cycle

PROFESSIONAL EXPERIENCE

IT Administrator

The Nakuru Specialists Hospital | Nakuru, Kenya | November 2024 – June 2025

- Sole IT contact for hospital operations, providing end-to-end support across clinical and administrative departments.
- Administered and maintained Smart Health and Smart Link billing platforms, achieving high uptime and data accuracy across patient financial records.
- Engineered a billing workflow applying ICD-10 and HCPCS coding standards, cutting claim errors and ensuring regulatory compliance.
- Reduced claim denials by 20% through rigorous insurance eligibility verification and systematic follow-up using AccuCare.
- Maintained strict PHI security and data governance, ensuring full alignment with hospital information security policies.
- Reconciled patient account payments daily, producing audit-ready financial records for management review.

IT Intern

11Degrees Consultants | Nairobi, Kenya | August – December 2023

- Built and maintained web applications using HTML, CSS, Java, and Python, improving end-user experience and load performance.
- Deployed a ticket management solution that cut support queue length by 18%, streamlining first-line technical support.
- Administered databases and managed IT assets, reducing administrative overhead by 19%.
- Acted as client-IT liaison for software rollouts, cutting the IT manager's workload by 49% and speeding up deployment cycles.
- Hardened network security through firewall configuration and continuous monitoring, with zero security incidents during tenure.
- Collaborated cross-functionally to resolve technical support requests within agreed SLAs.

Hospitality Associate

Naura Springs Hotel | Arusha, Tanzania | January – June 2019

- Grew sales by 20% through targeted upselling strategies and high-quality customer engagement.
- Increased event bookings by 25%, exceeding revenue targets and earning a formal performance award.
- Established guest satisfaction standards adopted property-wide.

KEY PROJECTS

Full-Stack Employee Management System (EmployeeMS)

Designed and built an end-to-end employee management system using React/Vite (frontend), Node.js/Express (backend), and MySQL (database), featuring role-based access control, JWT authentication, and a responsive UI. Demonstrates full ownership from system architecture through deployment and debugging.

Healthcare Billing Workflow Automation

At Nakuru Specialists Hospital, redesigned the insurance claims workflow by integrating AccuCare tracking and structured ICD-10 coding — reducing claim denials by 20% and accelerating reimbursement cycles.

Community Network Infrastructure Upgrade

Planned and executed a network infrastructure upgrade for underserved communities in Bissil and Lele, expanding digital connectivity and authoring self-help IT guides that reduced ongoing external support dependency.

EDUCATION & QUALIFICATIONS

Certification in Generative AI

Moringa School, Nairobi, Kenya

2026

Diploma in Information Technology

KCA University, Nairobi, Kenya

2023

Diploma in Hospitality Management

Epic Aviation College

2018

VOLUNTEER & COMMUNITY ENGAGEMENT

- Field enumerator with Emayian Organization Kenya — conducted community surveys and interviews across rural areas, ensuring safe handling of sensitive respondent data.
- Led community awareness campaigns on the dangers of FGM, connecting survivors to counselling and legal resources.
- Upgraded network infrastructure for elderly residents in Bissil and Lele communities, improving digital access.

- Authored technical guides enabling small community teams to self-resolve basic IT issues independently.
- Facilitated Red Cross sessions on first aid, CPR, and disaster preparedness.

PROFESSIONAL DEVELOPMENT & INTERESTS

- Active participant in cybersecurity challenges on Hack the Box platform.
- Regular attendee of technology conferences, hackathons, and IT workshops.
- Technology reviewer and early adopter of emerging hardware and software solutions.
- Exploring AI-assisted development workflows and LLM integration in web applications.
